

Benefits of Infrared Heat and The Silent Paint Remover™

- ✦ No chemicals
- ✦ No heat gun
- ✦ No shaving or sanding
- ✦ Tool does not create dust
- ✦ Very low energy consumption
- ✦ Efficient and labor saving
- ✦ Does not cause lead to be released in the form of plumbic gases from the paint when operated properly
- ✦ Easy clean up
- ✦ Reduces the risk of painters' burnout
- ✦ IR tube life length - 5000 hours
- ✦ Gentle on wood
- ✦ Significantly lower risk of fire compared to a heat-gun
- ✦ Scraping tools stay sharp significantly longer with this tool
- ✦ Low setup cost, no blade changing, no clogging, and no vibrations
- ✦ Environmentally friendly
- ✦ Softens paint and putty simultaneously
- ✦ Paint immediately after paint removal
- ✦ Ideal for window restoration
- ✦ Ideal for removal of thick varnish on wooden boats
- ✦ Creates a dry and disposable waste
- ✦ Exterior and interior applications
- ✦ Tool has no moving parts and is easily maintained
- ✦ Tool heats the mass and not only the surface
- ✦ Removes moisture in the wood during the process
- ✦ Neutralizes mildew and fungus
- ✦ The paint resin is drawn out to the surface creating a porous substrate and a tooth for the primer to grip on to.

Result: very long lasting painted surface

What is the Silent Paint Remover?

The Silent Paint Remover™ is a high quality tool for removing paint, varnish, adhesive, silicone caulk etc. The tool uses infrared heat to soften paint and varnish adhesive, silicone caulk etc.

After the substance is scraped off with a [high-quality pull scraper](#), you can paint immediately. Use Organic Linseed oil based paint for the absolute best results and minimum future maintenance, no cracking or peeling paint. We sell it.

NOTE: For stubborn paint, varnish or old window glazing add our [Organic purified RAW linseed oil](#) onto the surface (allow a few days for the oil to soak in) and the old stuff will react to the infrared heat for easier scraping. The oil will also bind the small amount of dust you may create with the scraper.

After removing paint, use Organic [linseed oil paint](#) to prevent any paint failure in the future. No cracking or peeling paint. Easy to maintain by adding the organic purified linseed oil every 5-10 years. Savings over time are gigantic.

- Heavy duty power switch and wires
- Automatic overheat shut off
- Exceptional heating penetration power
- USA made for the American electrical system
- 220 Volt tools now available
